

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A method ~~Process~~ for receiving files sent by a central server to an audiovisual data reproduction system, managed by an operating system and linked to the server, using ~~by means of~~ a data transfer link, ~~characterised in that the~~ process ~~comprising~~ comprises:
 - ~~a step consisting of~~ initialising a link between the central server and an audiovisual data reproduction system,
 - ~~a step consisting of~~ storing files sent by the central server on storage ~~means~~ of the audiovisual data reproduction system, each file comprising specified information representative of the type of data contained in the file,
 - ~~a step consisting of~~ searching, for each file received, a specific reception function, this search step being carried out by ~~means of~~ the specified information representative of the type of data contained in the file, and
 - ~~a step consisting of~~ processing each file by the corresponding reception function, the processing comprising copying ~~[[of]]~~ the file received to a specified storage area.
2. (Currently Amended) The method of ~~File downloading process according to~~ claim 1, wherein ~~characterised in that the storage step includes~~ consists of opening a file

in any permanent memory area with an available area of a specified minimum value, to write the data sent.

3. (Currently Amended) The method of File downloading process according to claim 1, wherein characterised in that the processing step comprises updating the update of a database of the audiovisual data reproduction system to account for the data contained in the file received.

4. (Currently Amended) The method of File downloading process according to claim 1, wherein characterised in that the search step is activated when the last data packet corresponding to a whole file is stored in memory.

5. (Currently Amended) The method of File downloading process according to claim 1, wherein characterised in that the specified information comprises the file extension and/or the name of the file received.

6. (Currently Amended) The method of File downloading process according to claim 3, wherein characterised in that, when the specified information represents a song file, the database update step comprises at least one of the following steps:

- a step consisting of checking the compatibility of the version of the song file with a the version of an the reproduction system operating system of the audiovisual data reproduction system,
- a step consisting of updating a file stored on the audiovisual data reproduction system containing the identification of all the songs stored on the audiovisual data reproduction system,

- ~~a step consisting of~~ updating a statistics table in the database making it possible to determine a the selection frequency of the song corresponding to the file stored in memory,

- ~~a step consisting of~~ updating a purchase table containing the number and name of all the songs purchased for the audiovisual data reproduction system, and

- ~~a step consisting of~~ updating a counter of songs that can be selected to check that the number of songs that can be selected is not greater than a specified threshold.
